Science Project Competitions and International Science Fairs

Our school is proud to be awarded the TOP 10 STEM School Award and Top 10 STEM Teacher Award in The Greater Bay Area STEM Excellence Award 2020 (Hong Kong).

Our school is devoted to the full support of innovation, collaboration and professional development for steering sustainable development to STEM education in Hong Kong and beyond. To nurture globally minded science leaders and to make positive impacts on society, our school provides diverse local and global STEM learning opportunities for students to share their ideas, showcase their projects and collaborate with others to solve problems. We also strive to build professional capacity and collaborations to promote STEM education in Hong Kong.

Great achievements from international STEM events include International Genetically Engineered Machine Competition (iGEM), International Olympiad contests, Global STEM Alliance Program of New York Academy of Sciences (NYAS), International Science Fair and national STEM events including National Olympiad contests, Hang Lung Mathematics Awards, Mathematics competitions, and Science project competitions. These involve concerted efforts of all the Science and Mathematics teachers to help students explore and pursue their passions along unpredictable paths. Indeed, the dedication and perseverance of our talented students are greatly appreciated.

I believe such diverse STEM opportunities would help our students to take up the challenges in the 21st century.

Congratulations and keep up the good work!

International Genetically Engineered Machine (iGEM) Competition

Dr. Christine Yu  
Department Head of Science & Mathematics

# The 9th Graduation Ceremony (2019-20)

The 9th Graduation Ceremony was successfully held on 16 October, 2020. We were delighted to have Mr. Kam-po Wong, SBS, BBS, MH to be our guest of honour. He delivered an inspiring and encouraging speech to our graduates, fully engaging the audience.

The significant ceremony marked the start of a new exciting chapter in our graduates' lives. We hope they can take away with them good memories and values learnt and sustain the friendships that they have forged as they continue their life journey. To celebrate this memorable moment, the graduate representatives and a team of 35 teachers delivered a brilliant singing and dancing performance on this special occasion. Our student helpers also played an important role in the ceremony. If it hadn't been for their commitment and diligence, we would not have had such a successful ceremony.

Dr. Ken Cheng & Ms. Winnie Au  
Heads of School Function Group

Mr. Kam-po Wong, SBS, BBS, MH and honourable guests

Teachers performing a dance

Special moments of the Graduation Ceremony

I was touched by the performance of our devoted teachers. Thank you for your gift and we will never forget your energetic dance.

Nicole Lui (Graduate)

Thank you for giving me the opportunity to express my gratitude towards the school in the graduation ceremony. It was a memorable and valuable experience which ended my secondary school life perfectly.

Priscilla Lung (Graduate)

Graduating online was certainly - different. However, it did not stop me from feeling all the emotions that a normal graduate would feel - grateful, proud, bittersweet, and sentimental. After all, it was the last goodbye to everyone. Joining the ceremony via Google Meet was not what I would prefer, but hey-ho.

Tony Chui (Graduate)

I felt incredibly proud of the graduates and was anxious about my role at the same time. Entering a reputable university is no easy feat. I can see the graduates have put great efforts into their studies, which reminds me to clarify my goals and make an all-out effort in my studies.

Katrina Siu (12B)

I started to realize that time flies and it will be my turn to attend as a graduate next year. Therefore, I would seize every minute and second, to enjoy the school life, and strive for greatness in the upcoming DSE.

James Lau (12B)

Through the experience, not only have I become more confident to speak in front of the audience, but I also learnt how to deal with unexpected circumstances.

Vanessa Lau (12C)

I was pleased to know that our graduates are all processing to top universities around the globe. Furthermore, I was able to enhance my communication skills. It was my pleasure to work with the other two experienced MCs.

Clarence Pang (11B)

I was impressed by Mr. Wong's speech, which was very inspiring. Despite his achievements as a prominent cyclist, he was willing to admit his nervousness about speaking on stage. I found his humble attitude admirable.

Abby Wong (12D)

## “Every champion has a story”

Sian Lee (10A) sent me her championship note about “The 21st Century Cup—National English Speaking 2020” on 27 September, 2020. She obtained her championship again in the grand finale, but this time in the senior division in Hong Kong. What an achievement and a record for a G10 student. She represented Hong Kong in the grand finale on 28 September, 2020 in China.

For a one-month G10 student, this is simply impossible—she is too young to have beaten other elite school or international school students again! This time, she swept away the title in the senior division. Simply too good to be true! All happened within one month: from 12 September to 28 September, 2020, and from her in-depth research and script writing of two polar extreme topics to the two consecutive days of intense contests—delivering two self-composed set topics and a last session of a heart-attack-prone impromptu. The whole challenge is incredibly energy-consuming and mind-boggling. Congratulations to Sian and all the participants.

Every learner has his/her story to tell, may it be a story about his/her conflict, retreat, withdrawal, or ultimate confrontation with the challenges that crop up. Sian has revealed her story of continuous learning and growth—from her excitement, fear, conflict, and struggle to her great effort, great success, great joy, and even great addiction to public speaking.

Every champion has a story! How about yours? Take the opportunity to transform yourself, seek better meaning for life, and compose your own story.

Dr. Clara Cheng

Multi-talented Sian - an amazing rendition!

## S.T. Yau High School Science Awards (Asia)

The S.T. Yau High School Science Award (Asia) [YHSA (Asia)] is a research-based competition co-organized by The Hong Kong Young Academy of Sciences. After passing through the stringent screening by the Assessment Panel for the Mathematics Category of YHSA (Asia), our team was among the 8 selected out of 18 to participate in the oral defense held on 24 October 2020. Our research project is titled “A statistical analysis of heart rate data during meditation”, done by Alpha Jo (12C) and Pok Hang Lai (12D) under the supervision of Mr. Tim Li. It is hoped that our students will like the process of scientific research and savour the joy of discovery.

▲同學輕鬆完成注射，手持針卡，笑容滿面

▲譚國雄老師接種注射式流感疫苗

▲MR. MODINI也接受噴鼻式流感疫苗

## 防範新型肺炎及流感夾擊 各位注意健康做好準備

2020年，新型肺炎肆虐，全球有數千萬人受到感染，亦有過百萬宗死亡個案。全球正在加緊疫苗研發，以減低新型肺炎對人類的影響。另一方面，冬季流感將至，面對新型肺炎及流感夾擊下，全港市民都需要做好防護準備。

因應上述情況，今年流感疫苗供應特別緊張，市面醫務所更出現「一針難求」的情況。幸好，學校早於暑假期間，已為全校師生預約流感疫苗注射服務。專業醫療團隊已於10月27日及10月28日分別到旺角初小部及將軍澳高小部、中學部為全體學生、老師及職員進行流感疫苗注射。

學校採用的是GSK(葛蘭素)在德國生產的四價疫苗(香港註冊號：HK-62234)，是根據世界衛生組織的建議，按照每年社會上流行的流感類型而備製的，安全可靠。期待新型肺炎疫苗也早日研發成功，助我們戰勝病毒，及早讓日常生活重回正軌！
